1. Open Chrome, and go to:

```
chrome://plugins
```

- 2. Locate the Adobe PDF plug-in, and do one of the following:
 - To have the Adobe PDF plug-in open PDFs in the browser, click Enable.
 - To use the Chrome PDF Viewer instead of the Adobe PDF viewer, click Disable for the Adobe PDF viewer. The Chrome PDF Viewer becomes enabled.
 - To have Chrome download PDFs instead of displaying them in the browser, shift-click Disable for the currently enabled viewer. This leaves both viewer plug-ins disabled so the PDFs won't display in the browser.

For more information, see the Google Chrome help topic <u>Plug-ins.</u>

Mozilla Firefox

- 1. Choose Tools > Add-ons.
- 2. In the Add-ons Manager window, click the Plugins tab, then select the Acrobat or Reader plugin.
